Recommendation Letter

To whom it may concern,

I am writing to recommend my former master's degree student, Nutta Sittirash, for the advertised position. Nutta enrolled in the Master of Science program in Transport and Geoinformation Technology at KTH Royal Institute of Technology in August 2022 and is on track to graduate in June 2024.

Nutta performed well in my courses (Applied AI in Transportation, Public Transport, Research Methodology and Communication Skills) and showed a keen interest in enhancing her skills. Currently, she is conducting research for her thesis, focusing on data-driven analysis of passenger responses to public transport disruptions using smart card data within the Division of Transport Planning.

Throughout my interactions with Nutta, I have found her to be mature, motivated, and committed to her field of expertise. She works well both individually and as a part of a team. Her passion for pursuing a future in public transportation is evident.

Therefore, I confidently recommend Nutta for the advertised position.

Yours sincerely,

Zhenliang Ma
Associate Professor
Transport Planning Division
KTH Royal Institute of Technology
