

December 25, 2021

To whom may concern,

My name is Mr. Olivier Griere. I occupy the position of construction manager at Saipem Public Limited Company and have been working in engineering and Construction for 36 years. I wish to recommend Ms. Nutta Sittirash for admission into your Master's program.

I worked with Nutta from May 2019 to December 2020 on PTTLNG Nong Fab LNG Receiving Terminal Project in Thailand. Her position was quality control engineer. Nutta has a positive attitude and a good productivity, even when encountering difficult situations. Nutta is proactive, decision maker, and professional on all the Quality, Engineering & construction aspect. She was developing her competences and was a reference point for the team.

Nutta proved that she has a profound knowledge of the engineering field and she was a real support for the project. She also wrote effective method statements of construction based on the combination of her engineering knowledge, analytical skills and English ability. Having monitored her resilience, I am absolutely convinced that Nutta will devote herself to your Master program with all requested and mandatory aptitude

I, therefore, strongly recommend Ms. Nutta Sittirash. I am sure she will deeply contribute in a professional and positive way to this Master's program.

Sincerely yours,

Olivier Griere
