Letter of Recommendation

To whom it may concern,

My name is Wilco Burghout. I am a researcher in traffic modeling, simulation and analysis. I have been the Director of the Centre for Traffic Research at KTH Royal Institute of Technology for 12 years. I am writing this letter to recommend my master's degree student, Nutta Sittirash, for the advertised position.

Nutta was a student in my courses: Applied AI in Transportation, and Public Transport. After passing all mandatory courses within the programme "M.Sc. Transport and Geoinformation Technology," Nutta decided to write her thesis project with the Transport Planning Division. Therefore, I became her supervisor and worked with Nutta on the project "A Smart-card Based Analysis of During and Post-Disruption Impacts on Public Transport Passengers' Travel Patterns" from January to June 2024. Data used in the project was supported by the Stockholm Region, and we have continued working on the project to the present day.

While supervising Nutta, I very much appreciated her positive attitude and outstanding work ethic. She has been an enthusiastic and cooperative student throughout the entire project, demonstrating competence in developing a framework for the research area, studying disruptions in the Stockholm Public Transport Network. She has effectively applied my advice to improve both the project outcomes and her personal skills. Nutta is disciplined and able to work independently or as part of a team. Having monitored her abilities, I am convinced that Nutta will apply her skills effectively in her responsibilities and deliver great work for your institute/company.

I strongly recommend Nutta to the position she is applying for. I am confident she will contribute in a professional way to your team and the community she participates in.

Sincerely yours,

Wilco Burghout
Director Center for Traffic Research
Transport Planning Division
KTH Royal Institute of Technology
